

Pratik Pralhad Argade

Senior DevOps / Platform Engineer | AWS Certified Solutions Architect
+91 9673483686 | argadepp@gmail.com | Pune, Maharashtra, India

PROFESSIONAL SUMMARY

AWS Certified Senior DevOps / Platform Engineer with 7.8+ years of experience designing, automating, and operating cloud-native infrastructure at scale. Deep expertise in Kubernetes (EKS), Terraform, CI/CD, GitOps (ArgoCD), observability, and multi-cloud environments (AWS, Azure). Proven track record of driving infrastructure reliability, security hardening, cost optimisation, and developer velocity across banking, fintech, telecom, and enterprise domains. Adept at leading infrastructure modernisation initiatives and influencing platform strategy.

CORE COMPETENCIES

Infrastructure Automation • Kubernetes & Container Orchestration • GitOps Practices • CI/CD Pipeline Engineering • Terraform & IaC • Cloud Security & IAM • Observability & Monitoring • Disaster Recovery & Multi-Region Failover • FinOps & Cost Optimisation • Kafka & Streaming Platforms • Developer Platform Engineering • Team Leadership & Mentoring • Sprint Planning & Delivery Management

TECHNICAL SKILLS

Cloud	AWS (EC2, EKS, ECS, RDS, S3, IAM, VPC, PrivateLink, Route 53, CloudWatch, CloudFormation) Azure (AKS, App Services, Azure Functions, Azure DevOps)
IaC & Config	Terraform, Terragrunt, CloudFormation, Ansible, Packer
Containers & K8s	Kubernetes (EKS), Docker, Helm, ArgoCD, Pod Security Policies
CI/CD	Jenkins, Jenkins Shared Libraries, GitHub Actions, GitLab CI, Azure DevOps, Atlantis
Observability	Prometheus, Grafana, Thanos, CloudWatch, ELK Stack, Dynatrace, Splunk
Messaging	Apache Kafka, Zookeeper, Kafka Connect, Schema Registry, ClickHouse
Security	Cross-account IAM, VPC PrivateLink, Security Hardening, Compliance, Secrets Management
Languages	Python, Bash / Shell Scripting
Databases	Oracle, MySQL, PostgreSQL, MongoDB
Version Control	Git, GitHub, GitLab

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer | **Xoriant Solutions** | Pune | Feb 2025 – Present

Client: Cisco Systems *Nov 2025 – Present*

- Led a team of 2 engineers — conducted code/PR reviews, provided technical guidance, delegated tasks, and drove sprint planning and delivery tracking.
- Mentored and onboarded junior engineers on Terraform best practices, Kafka architecture, and AWS infrastructure patterns, improving team velocity and code quality.
- Provisioning and managing AWS infrastructure using Terraform; developing and maintaining reusable, versioned Terraform modules to accelerate environment onboarding.
- Automating infrastructure configuration and environment setup using Ansible playbooks, reducing manual setup time significantly.
- Designing and deploying Kafka ecosystem infrastructure (Zookeeper, Kafka Brokers, Kafka Streams, Kafka Connect, Schema Registry) for high-throughput event streaming.

- Integrating Kafka with ClickHouse to support real-time data ingestion pipelines for high-performance analytics workloads.
- Leveraging AI-assisted engineering tooling to automate troubleshooting, optimise infrastructure configurations, and enhance deployment reliability.

Client: NICE Systems *Feb 2025 – Nov 2025*

- Designed and implemented end-to-end Jenkins CI/CD pipelines, improving build reliability and deployment automation across multiple environments.
- Developed and maintained Jenkins shared libraries to promote pipeline standardisation and reusable components across teams.
- Built secure, scalable AWS infrastructure using CloudFormation, enforcing compliance and security best practices.
- Implemented cross-account IAM roles and resource sharing strategies, strengthening security boundaries across AWS accounts.
- Managed containerised workload deployments on Amazon ECS, optimising service performance and auto-scaling behaviour.
- Implemented comprehensive observability using Amazon CloudWatch — metrics dashboards, centralised log aggregation, and proactive alerting.

Senior DevOps Engineer | **VOIS (Vodafone Intelligent Solutions)** | Pune | Aug 2024 – Feb 2025

Client: Fusion 50 (Germany) *Aug 2024 – Feb 2025*

- Led architectural design and execution of a resilient, multi-environment AWS infrastructure using Terraform and Terragrunt, achieving high availability and fault tolerance.
- Oversaw administration and enhancement of Kubernetes workloads on Amazon EKS; implemented GitOps workflows using ArgoCD for automated, auditable deployments.
- Built secure, GitOps-compliant CI/CD pipelines using Jenkins and ArgoCD, reducing deployment lead times and configuration drift.
- Integrated Jenkins pipelines with Atlantis for automated Terraform plan/apply workflows, enforcing policy-as-code and team review gates.
- Authored Python scripts automating infrastructure provisioning tasks, increasing operational efficiency by eliminating manual toil.
- Led migration of Jenkins pipelines to GitHub Actions workflows, modernising CI/CD toolchain and reducing maintenance overhead.
- Created environment-specific AMIs using Packer within CI/CD pipelines for consistent, immutable infrastructure deployments.

DevOps Engineer | **Coditas Technologies LLP** | Pune | Jun 2022 – Aug 2024

Client: JPMC / Tavisca *Jun 2022 – Aug 2024*

- Specialised in AWS cloud infrastructure automation using CloudFormation with Jenkins integration for deployment efficiency and auditability.
- Managed multiple EKS cluster setups via CloudFormation; oversaw ongoing Kubernetes utility deployments and lifecycle management.
- Enhanced EKS cluster security through implementation of Pod Security Policies, RBAC, and network segmentation.
- Streamlined AWS infrastructure management using Terraform for repeatable, version-controlled provisioning.
- Implemented monitoring and observability using Prometheus, Thanos, Grafana, Dynatrace, and ELK Stack for full-stack visibility.
- Managed AKS clusters and Azure App Services with CI/CD pipelines in Azure DevOps and GitLab CI.
- Awarded Innovator of the Year for driving platform improvements and process automation initiatives.

DevOps Engineer | **Heera Software Pvt. Ltd.** | Pune | Apr 2022 – Jun 2022

- Provisioned and managed AWS and Azure cloud infrastructure aligned to project requirements and security standards.
- Designed and maintained CI/CD pipelines in Azure DevOps for automated build, test, and deployment workflows.
- Managed Azure DevOps Boards for sprint planning, task tracking, and release co-ordination across project teams.

- Supported environment setup, deployment automation, and cloud resource configuration across multiple concurrent projects.

IT BSA – Cloud / DevOps Engineer | Axis Bank Ltd. | Mumbai | Sep 2018 – Apr 2022

- Implemented and managed cloud infrastructure and DevOps processes using AWS core services (EC2, S3, VPC, IAM, RDS).
- Automated application deployment pipelines using Jenkins, Ansible, and Shell scripting, reducing manual deployment effort.
- Administered Oracle, MySQL, PostgreSQL, and MongoDB databases; managed backup, patching, and performance tuning.
- Managed deployment, configuration, and maintenance of on-premises enterprise applications on Linux-based servers in a private data centre.
- Implemented security hardening, OS patching, and backup strategies to meet banking compliance and regulatory requirements.
- Awarded Best Performer for contributions to infrastructure reliability and automation improvements.

EDUCATION

PG – Diploma in Advanced Computing (DAC) | Sunbeam Infotech, Pune | 2018

B.E. – Electronics & Telecommunication Engineering | Pune University | 2017

CERTIFICATIONS & ACHIEVEMENTS

- AWS Certified Solutions Architect – Associate (AWS CSA)
- Innovator of the Year – Coditas Technologies LLP
- Best Performer – Axis Bank Ltd., Mumbai

PERSONAL DETAILS

Date of Birth: 22 April 1995 **Languages:** English, Hindi, Marathi
